TMO NETWORKING & INDUSTRY SHOWCASE

Thursday, April 9th, 2026

600 16th St San Francisco, CA 94158
United States

AMGEN

JESSICA ENOGIERU, PharmD, PhD, RPh

Amgen, a Fortune 150 global company, has been a pioneer in the world of biotech since 1980. Through our focus on four therapeutic areas –Oncology, Inflammation, General Medicine, and Rare Disease– Amgen reaches millions of patients each year. Our award-winning culture is collaborative, innovative, and science based. Expand your potential and apply your knowledge and passion in our career development programs.

ASTRAZENECA

BAILEY BISCHOF, PharmD, MBA, BCGP

Bailey Bischof is a Medical Science Liaison at AstraZeneca based in San Francisco, with 15 years of clinical pharmacy experience in geriatrics, hospice, and transitions of care. At the showcase, she will share how innovation moves from research to clinical impact and highlight asthma resources that help identify uncontrolled asthma and support optimized care pathways.

GRAVITAS

IONICA MACADANGDANG, MTM

Gravitas Medical is transforming enteral nutrition with the Entarik Smart Feeding System, the world's first FDA-cleared intelligent feeding tube. Recognized with a Breakthrough Device designation, our technology eliminates tube misplacements and provides real-time data on reflux and gastric impedance to enable truly personalized nutrition.

MITHRL

MICHELLE GARRED, M.S.

Mithrl is an AI company accelerating discovery in pharma and biotech. Its platform uses natural language to generate transparent, reproducible workflows for complex research data, helping scientists move from analysis to insight more efficiently. By streamlining time-intensive processes, Mithrl supports faster and more effective scientific decision-making.

OMNICELL

ANTHONY YASKO BS; LONDON ENGLAND B.S.

Omnice ll is a leading healthcare technology company focused on transforming medication management through innovation. We combine automation, advanced analytics, and intelligent software to create smarter, more connected systems that improve how medications are managed across healthcare.

TEMPUS AI

JOE DIMICK B.S.

Tempus is a healthcare technology company advancing the use of AI in precision oncology. By integrating comprehensive molecular and clinical data, we deliver actionable insights that help oncologists make more informed decisions throughout the patient journey.

4D MOLECULAR THERAPEUTICS

MELISSA A. CALTON, PhD.

Dr. Melissa A. Calton is Vice President of Early-Stage Product Development at 4D Molecular Therapeutics (4DMT), where she leads the advancement of genetic medicine programs from preclinical development through clinical proof-of-concept. With training in pharmaceutical sciences, pharmacogenomics, genetics, and pharmacology, she brings deep translational expertise as both a published researcher and frequent national and international speaker.
